Hygiene Advice

YOU CAN HELP LIMIT THE SPREAD OF THE CORONAVIRUS BY FOLLOWING THE TIPS BELOW.

The Ten Most Important Hygiene Steps

- Wash your hands often
- Wash your hand thoroughly
- Keep your hands away from your face
- Follow proper coughing and sneezing etiquette (keep your distance from others and sneeze or cough into the crook of your elbow)
- Isolate yourself from others if you are ill
- Protect any open wounds
- Keep your home clean
- Be sure to wash food properly
- Wash dishes and laundry using hot water
- Ventilate your home or office regularly

In addition, abstain from shaking hands.
